PERSONAL STATEMENT

A passionate graduate software developer with experience in multiple programming languages such as Java, JavaScript and fast-paced agile development process looking for internship or full-time position. Having just completed my degree in Computer Science, I am now looking to start my career as a software developer or video game developer and be part of the globally successful application development process.

WORK HISTORY

Freshmax

Christchurch, New Zealand
Jun 2018 - Present

Store Person

I am currently working here as a casual until after my graduation.

- Cooperation with my team to maximise the efficiency of our performance
- Unloading and loading stock using a forklift
- A keen eye for detail to ensure accurate delivery

Bush Inn Tavern

Christchurch, New Zealand
Sep 2015 - Aug 2018

Bartender

Part-time work whilst completing my Bachelor of Science degree.

- Delivering efficient and accurate service experience for three years
- Positive and meaningful customer interaction
- Handling large sums of cash
- Food preparation and drink assembly requiring high attention to detail and levels of hygiene
- Solving problems for difficult customers that require calm and logical thinking

QUALIFICATIONS

University of Canterbury

Christchurch, New Zealand
2013-2019

Bachelor of Science

Majoring in Computer Science

Mountainview High School

Timaru, New Zealand
2008-2012

NCEA Level 1-3

Subjects include:

Digital Technology, Physics, English, Calculus, Statistics

TECHNICAL SKILLS

Java

- 2 years of experience in Java developing apps for assignments and group projects
- Developed an app to visualize live data during America's Cup races. Following the conclusion of America's Cup, used the same software to develop a sailing game.
- In charge of decoding a stream of binary data and extracting important information, creating a UI for settings, implementing interesting features such as sharks, whirlpools and making the game touch screen compatible.

Agile software development

- Practical experience with agile software development (SCRUM) for a whole-year group project course involving the development of two projects mentioned above.
- Very familiar with roles and development life cycle involving analysis and planning, sprints, daily stand-up, review, and retrospection.

Python

- 2 years of experience Python involving assignments and group projects particularly to program algorithms such as shortest-path algorithms, graph search algorithms, and sorting algorithms.

JavaScript

- 1 year of experience in JavaScript
- Developed a website for crowdfunded projects
- Creation of a database to store user details and projects using MySQL.
- Use of Vue.js to implement user registration, sign in, searching projects by title, sorting, pledging a project and publishing your own project.

Unity

- Developed multiple Virtual Reality games using Unity
- In charge of creating assets such as an in-game menu that has consistent format across multiple scenes with animation and implementing sound effects and gameplay mechanics such as score system, win/lose conditions.

UI/UX design

- Design of a UI for smart garden application for portable devices
- Assessing the importance of features and frequency of features from the user's perspective; keeping consistent format and layout of the application and balancing simplicity and features to ensure a simple but effective application.

PERSONAL SKILLS

Problem Solving

Working at a bar has taught me how to problem solve in a logical and calm manner while dealing with difficult customers. For example, pokie machines at the bar can occasionally give out incorrect payments resulting in unhappy customers and complaints. I am able to use sound judgement to resolve problems like these and conflict under pressure. As a software developer, I thrive on overcoming challenges and am always motivated by the reward of solving a problem.

Communication

Having worked in numerous group projects and a bar environment I have developed strong verbal and written communication skills to ensure customers are more than satisfied. I believe communication is key to working effectively in a team and building strong customer relationships.

Ability to perform under pressure

In my course involving numerous group projects, we were faced with tight deadlines. Using teamwork and efficient time management we could deliver quality products consistently and on time. Working in a bar environment during peak hours has trained me to perform well under heavy pressure.

Teamwork

I am able to work effectively in a team in group projects and at the bar. I have a relatable personality and can identify and take on required roles in a team. For example, during a group project, we needed to ensure the project was running smoothly up to the presentation but had limited time due to other deadlines. Having completed all of my tasks for the sprint, I was one of the few to volunteer to review everything before the presentation. This allowed us to have a successful presentation and also allowed my team members to focus on their assignments.

REFEREES

Danny Kumar

Bar Manager - Bush Inn Tavern
027 825 1919

Gurbhagat Singh Samra

Shift Manager – Freshmax
027 640 0001
